EDUCATION

Future University in Egypt

Bachelor's Degree in Computer Science

2022-2026

EXPERIENCE

Jelecom 07/2025 – 08/2025

Cloud Engineer

- Deployed and managed Azure Virtual Machines (VMs) with networking and storage.
- Configured VNets, NSGs, and Azure File Share for secure access and shared storage.
- Published a website on Azure and applied cloud best practices for resource management and security.

Egyptian Collegiate programming Contest 07/2025

Contestant

- Solved algorithmic and data structure problems under time constraints.
- Enhanced problem-solving, teamwork, and analytical thinking skills.

Arab African International Bank 08/2024

Full-Stack Developer

- Developed user and merchant portal systems using Node.js, Express.js, and React.js.
- Implemented APIs, database management, and front-end UI integration.

PROJECTS

Intelligent Interview Simulation System (IISS) | Graduation Project

- Developed an AI-powered interview simulation platform supporting Web, Mobile, and Desktop applications.
- Built a full-stack architecture using Flutter, Node.js, Express.js, and MongoDB.
- Integrated AI modules for facial emotion detection, eye tracking, tone analysis, speech processing and identity verification.
- Developed recruiter and candidate workflows with AI-generated feedback and performance reporting.

Airline Tweet Sentiment Analysis & Deployment

- Developed an NLP-based sentiment analysis system for airline-related tweets.
- Performed text preprocessing and feature extraction using TF-IDF.
- Extracted textual features using TF-IDF with 5,000 features for machine learning modeling.
- Trained and optimized Logistic Regression and Naive Bayes models using GridSearchCV.
- Deployed the solution using FastAPI and Streamlit for real-time predictions.

Cloud Infrastructure on Microsoft Azure

- Deployed virtual machines, configured networking /security, and hosted a website on Azure

AI & Machine Learning Projects

- Built machine learning models including Logistic Regression, SVM, Random Forest, and K-Means on medical datasets.
- Developed CNN and Autoencoder models for Alzheimer MRI classification.

SKILLS

Languages: Python, Java, C, C++, JavaScript, TypeScript.

Technologies: React.js, Node.js, Express.js, FastAPI, MongoDB, SQL Server, Microsoft Azure, AWS, Git, GitHub.

AI & ML: Machine Learning, Deep Learning (CNNs, Autoencoders), NLP, Computer Vision, TensorFlow, PyTorch, Scikit-learn, OpenAI Whisper.

Tools & Concepts: REST APIs, Websocket, TF-IDF, PCA, Postman, VS code, Google colab, PyCharm.
