EDUCATION

Future University in Egypt

Bachelor's Degree in Computer Science

2022-2026

EXPERIENCE

Arab African International Bank 08/2024

Full-Stack Developer

- Developed user and merchant portal systems using Node.js, Express.js, and React.js.
- Implemented APIs, database management, and front-end UI integration.

Jelecom 07/2025 – 08/2025

Cloud Engineer

- Deployed and managed Azure Virtual Machines (VMs) with networking and storage.
- Configured VNets, NSGs, and Azure File Share for secure access and shared storage.
- Published a website on Azure and applied cloud best practices for resource management and security.

Egyptian Collegiate programming Contest 07/2025

Contestant

- Solved algorithmic and data structure problems under time constraints.
- Enhanced problem-solving, teamwork, and analytical thinking skills.

PROJECTS

Bluetooth RC Car

- Controlled a robotic car via Bluetooth using Java.

ATM System

- Developed an ATM simulation program using Java.

Swimming Academy Management System

- Designed and implemented a SQL Server based system for academy operations.

Cloud Infrastructure on Microsoft Azure

- Deployed virtual machines, configured networking /security, and hosted a website on Azure

AI & Machine Learning Projects

- Applied Logistic Regression, SVM, Random Forest, and K-Means on medical datasets.
- Designed and trained Deep Learning models (CNNs, Autoencoders) for Alzheimer MRI classification.
- Performed data cleaning, preprocessing, normalization, PCA, and model evaluation.
- Tools: Python, TensorFlow/Keras, Scikit-learn, NumPy, Google Colab, PyCharm

SKILLS

Programming: Python, Java, C, C++

AI & ML: Machine Learning, Deep Learning (CNNs, Autoencoders)

Software Engineering: OOP, SDLC, Data Structures

Web: HTML, CSS, React.js, Node.js, Express.js

Databases: SQL, SQL Server

Cloud & Tools: Microsoft Azure, AWS, Git, GitHub
